EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney James Henry on 8/2/07.

The application has been amended as follows:

In the claims:

In claim 22, line 4, the numeral characters "220", "100", and "140" have been deleted.

In claim 22, line 6, the numeral character "260" has been deleted.

In claim 22, line 7, the numeral characters "135" has been deleted.

In claim 22, line 8, the numeral characters "120" has been deleted.

In claim 39, line 2, the term "medium" has been changed to --memory--.

In claim 41, line 2, the term "medium" has been changed to --memory--.

In claim 42, line 2, the term "medium" has been changed to--memory--.

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The closest prior art of records, Bradd et al, US 6,434,229, Thornton et al, US 6,363,065; Cartwright et al, US 6,075,942 singularly or in combination fails to teach or suggest the following:

A residential gateway to receive channel associated signals (CAS) from a PBX switch, the residential gateway comprising (inter alias):

CAS module to receive a table from the management module, the table including a plurality of entries, each of the plurality of entries including a first line signaling state, a second line signaling state, a first time duration, and an event, to receive the channel associated signals from a PBX switch, to recognize a change of line signaling state from a former state to a new state, to find a first entry in the table where the former state is the same as the first line signaling state and the new state is the same as the second line signaling state, to set a timer for the first time duration of the first entry, and to send an indication of the event of the first entry to a call agent through a call control device if the timer expires before the CAS module recognizes a further change of line signaling state, as indicated in independent claim 22.

A method/ means /or computer readable memory having executable instruction for receiving channel associated signals (CAS) from a PBX switch, the method comprising receiving a table including a plurality of entries, each of the plurality of entries including a first line signaling state, a second line signaling state, a time duration, and an event; recognizing a change of line signaling state in the channel associated signals from a former state to a new state; finding an entry in the table where
